

## Year 12

**One-to-one subject advice:** Our students are given advice from a subject teacher about subjects for the best entry to their chosen field.

**Programme workshop:** Students given information about the application process, the entrance exams, and advice about what universities are looking for in terms of work experience and attainment.

**One-to-one coaching:** Each student works with their form tutor on a half termly basis, with a focus on self development, work and future aspirations.

**Careers meetings:** Our Careers & Employer Engagement Manager works with the students to find appropriate work experience to support their future applications.

**Work experience week:** With a timetabled week in the calendar, the students can arrange a full week of full-time work experience at an appropriate location. This experience can then be used in conjunction with other more regular work experience.

## YEAR 13 September - October

**Personal statement help:** Our students go through a process of checking and improving their personal statements with their trained for tutors, subject specialists and Dr Lally to ensure it is as competitive as possible.

**UCAS application support:** The students are given a range of support to help in their UCAS applications to university, with sessions on what to look for when applying to university, how to write a personal statement and subject specific advice.

**Year 13**  
October-  
July

**Entrance exam support:** Medicine and dentistry have entrance exams: the UCAT and BMAT. Depending on the university and course, students will need to take one of the exams: UCAT taken privately as organized by the student, BMAT taken and entry done through the college.

**Interview practice:** The application process involves interviews, some with multiple mini-interviews and our students have the opportunity to practice these skills with subject specialists.

## **What other support is available?**

**Careers@Deyes will send out regular updates and opportunities.** Mrs, Dainton-King works with a several hospitals, dentists, doctors, vets and farms to place our students in the best possible placement to ensure our students have the opportunity to experience their possible future vocations before their applications.

During fortnightly Monday Tutorial sessions students have the opportunity to reflect on both their academic and soft skills which enhance the students' applications, making them as competitive as possible.
